SANTA FE SHOWS BIG EARNINGS IN MARCH

Railroad Looks for Greatly Increased Business from Now on and Through the Summer Months.

Topoka, Kan., March 24.—An increase in the March earnings of the Atchafalaya & Santa Fe railway, indicating that the country is slowly awakening after the long winter business slowness, brings hope to the hearts of the hundreds of shopmen and dependent interests in Topoka today. The gain in traffic this month is far from the mark set by March of last year, to be sure, but the losses are dwindling before the disappointing decrease of January and February, and railway traffic men in Topoka of both the Santa Fe and Rock Island lines are looking forward to the distant terminal of retrenchment and stringent finance.

Incidentally, and with vast importance to Topoka, the brighter showing of Santa Fe finances will bring about better times in this city. With 2,500 Santa Fe shopmen in Topoka working only forty hours a week the pay roll this winter has fallen with a crashing effect upon business. The signs of increased traffic, bringing about a gain in earnings, is of vital importance to Topoka.

The Santa Fe suffered a dangerous decrease in traffic in January and February. Unsettled conditions in the country in general, increased freight expenses, floods in California, and depression caused by legislative and national control, weakened the returns of the road. As a result a general shop and office retrenchment was ordered over the system. The Topoka shops were limited to forty hours a week and general offices were let out at the general offices.

\$5,000 TO BE SPENT IN RURAL SCHOOLS OF SANTA FE COUNTY

Santa Fe, N. M., March 26.—Excluding other new buildings to be erected at once or in other parts of the county, a trifle over \$5,000 is to be spent right away on new schools in the south end of Santa Fe county and including two districts north of Glorieta, according to County Superintendent Conway, who has just returned with Mrs. Conway from a 150-mile trip to various schools in the south end of the county, visiting a little over 200 pupils. At Veneta, where one modern one-room \$300 school has just been completed, another one, modeled after the new plans and specifications, is to start next week at a cost of \$600, the state furnishing \$400. At Hyer it was arranged to build a one-room school on land donated by the people, cost \$500, \$300 from the state. At Golden, Manager Wood of the Gold Bullion company donated an acre of land of the company's property on which will go up a \$1200 two-room school, \$600 from the state. At Galisteo will be built a \$1,200 two-room school and at Kennedy \$400 will be spent on two additional rooms for manual training and domestic science, all the new buildings being equipped for this department.

SILVER CITY WILL PAVE BUSINESS SECTION

Fifty-Two Percent of Property Owners Interested Approve Action for Important Improvement.

[Special Correspondence to the Herald] Silver City, N. M., March 25.—Silver City has determined to pave its business section and the work is to begin in the immediate future. Fifty-two per cent of the property owners along the streets proposed to be paved have signed petitions in favor of the paving, and it is expected that there will be no further opposition to the project. The total cost of the paving proposed will be about \$10,000. It is expected that asphalt will be used at a cost of about \$2 per square yard.

CARPENTERS FINISHED FOR WORKING ON SUNDAY

The Sunday law is being observed in Silver City these days. You can put that down as a fact. Carpenters doing a rush job on the Silver City National bank building Sunday were arrested by the police for violating the Sunday law. They pleaded guilty to the charge, but being their first offense so far as Judge Newton could ascertain he let them go with a warning never to work again on Sunday. Incidentally the officers in their zeal for the public morality locked up the building, thereby imprisoning the entire congregation of the Christian Science society which was holding devotional exercises in a lodge room upstairs. The Scientists experienced some difficulty in getting out.

James S. Fielder, a well known New Mexico lawyer, formerly of Silver City but for ten years in practice at Deming, will move back to Silver City in the near future.

ALAMOGORDO TO HAVE REVIVAL SERVICES

Alamogordo, N. M., March 25.—Alamogordo is to have a big revival. The services will open next Sunday at the First Baptist church, with Rev. E. B. Atwood, general secretary of Baptist missions in New Mexico, conducting the services. Much interest is being manifested in the revival and large congregations are expected at the daily sessions.

Mrs. H. W. Carter, wife of the pastor of the First Methodist church at Gallup, and her two sons have arrived in Alamogordo. Mrs. Carter came here for the benefit of her health and will remain for an indefinite period.

"Generally debilitated for years. Had sick headache, lacked ambition, was worn out and all run down. Burdock Blood Bitters made me a well woman."—Mrs. Chas. Freitoy, Moun-

ROSWELL NOW SURE OF ANNUAL LIVE STOCK SHOW

Stock Selling of Pecos Valley Fair Association Progressing Rapidly and Project Looks Like Success.

Roswell, N. M., March 26.—The sentiment for the organization of the First State Livestock Show and Products exposition is growing daily. While the steering committee of the Commercial club has had a few wet blankets thrown at them, they have, after explaining the purpose of the association, convinced the knackers of the advisability of the show, and as in one case the same person who knocked it at first immediately took \$250 worth of stock.

While working out the details the committee is also working out some of the features which are to be a part of the 1914 show.

There will be an egg-laying contest. Dairy cows will be brought to the grounds, and fed and milked right on the ground, and the milk weighed. Other stock will be kept right on the ground, where they have been entered for the contest, so that in the case of the dairy cows the people can see just how the best producers care for and feed their stock and poultry.

The purpose of the livestock show will be to prove the value of the Pecos valley climate for the raising of fancy livestock and poultry, besides the products that have few equals over the whole country. It will be the purpose to establish a reputation for the valley stock. So that when Texas, Oklahoma, Kansas or Arizona stockmen want good breeding stock they can get them.

That this amounts to considerable in the course of a year, an instance can be cited. Sixty bulls were shipped into this county from Missouri, which brought an average of \$150 each. That amount of money could have been kept in the valley, and instead of sending for the bulls, or billies, or the like, they can be raised here, and the stockmen can come here and purchase our stock. That this is becoming a dairy country can be noted from the many fine herds of the valley stock which have come to the valley in the past six months, and these herds are increasing weekly.

Two years ago the dairy country people of the north had no income. Today Portales farmers are receiving a monthly income of \$4000 and the little town of Elda gets a monthly income of \$2,000.

PULLMAN COMPANY WILL BE ABLE TO WORRY ALONG

Comfortable Little Gain of \$3,000,000 Last Year by People who Work While You Try to Sleep.

Santa Fe, N. M., March 26.—An idea of the enormous business done by the Pullman Car company in transporting Americans while they are asleep—or try to sleep—was obtained today when the clerical force of the state corporation commission finished completing some statistics on the company founded by George M. Pullman in 1861. The figures show a comfortable gain in business of three and one-third million dollars in the year 1913. The capital stock outstanding was \$116,697,712; revenues, \$40,193,218.27; expenses, \$26,712,979.33; net revenue, \$13,480,238.94.

The dividends declared, 8 per cent, were \$8,793,824.64; average for the year, sales \$2,394,129.99; total surplus, \$2,932,793.58; total taxes in New Mexico, \$2,927.42.

THIRTY-EIGHT YOUNG FARMERS IN PUBLIC SCHOOLS OF ARTESIA

Santa Fe, N. M., March 26.—Thirty-eight boys and girls are studying agriculture in the Artesia public schools, according to a report by Superintendent T. E. Grover to Miss Myers, industrial education supervisor. Fifteen experiments have been performed and it will reach 50 by the end of the term. The pupils visited one of the finest fruit farms on the Pecos and learned much. Three boys are breaking ground for industrial club work and some of the girls will enter. A manual training class is to be organized next year. Eighteen girls in domestic science do sewing and cooking; the embroidery and the latter practice work as outlined in Morris' Household Science and Arts; study of food principles, elementary dietetics, and food composition, with the aid of diagrams. A well furnished room for this department will be installed next year.

CO-OPERATION BY STOCKMEN AND FARMERS

Pecos Valley Banker Gives Carlsbad Men Sound Advice on Way to Keep Money at Home.

[Special Correspondence to Herald] Carlsbad, N. M., March 25.—"Thousands of cars of hay and grain after train of cattle and sheep move out of the Pecos slope every year," says George M. Cooke, cashier of the First National bank of Carlsbad. "We produce a world of food on the farms in the valley, and cattle and sheep in great numbers on the surrounding range."

And Mr. Cooke knows. It is part of his business. "The strange part of it, however, is the fact that the farmers and the stockmen are operating independently, when it would be to their mutual profit to work hand in hand. One has feed that needs a market, the other has stock that can make a market at home for the feed. The cattle and sheep being finished at home would command better prices on reaching the market." To illustrate his point, Mr. Cooke cites a case where 200 good ewes were sold at \$2 each in the fall that now would easily bring \$5. The owner did not have the feed and sold at a sacrifice. In another case 1,700 lambs were sold in the fall at five cents a pound, averaging 20 pounds. Today they would be worth at least seven cents and if fed through the winter would now average \$5 pounds. "About \$50,000 in cattle and horses pass through the Carlsbad banks alone in 1913, while sheep sales made at least \$125,000 more. There was plenty of feed in the Carlsbad district to have fattened every hoof. Here is a good opening for feeding, in my opinion, and plans should be laid for this season's operation by the time hatching begins in May."

Mr. Cooke thinks well of the idea as a method of supplying succulent food cheaply. And he thinks every farm should have a drove of hogs.

SCHOOL SECTIONS IN BERNALILLO COUNTY OPEN FOR LEASE

Following is a list of the vacant school sections in Bernalillo county on February 1st, 1914, which are subject to lease for grazing or agricultural purposes. Blank applications or further information in regard to the rental prices will be furnished upon request to Commissioner of Public Lands, Santa Fe, N. M.

The following postoffice orders affecting New Mexico have been issued:

Tex. & N. Mex. State Line (n. o.) to Tucumcari, C. R. I. & P. Ry. Co., 52.61 ms. From July 15, 1913, state terminal distance at Tucumcari, at new site, as 19 m., increasing length of route .92 m.

Dawson to Tucumcari, El Paso & Southwestern Co., 132.11 ms. From July 15, 1913, state terminal distance at Tucumcari, at new site, as 19 m., increasing length of route .92 m.

Tucumcari to Santa Rosa, C. R. I.

WISHED SHE COULD DIE

And Be Free From Her Troubles, but Finds Better Way.

Columbia, Tenn.—"Many a time," says Mrs. Jessie Sharp, of this place, "I wished I would die and be relieved of my suffering, from womanly troubles. I could not get up, without pulling at something to help me, and stayed in bed most of the time. I could not do my housework."

The least amount of work tired me. My head would swim, and I would tremble for an hour or more. Finally, I took Cardui, the woman's tonic, and I am not bothered with pains any more, and I don't have to go to bed. In fact, I am sound and well of all my troubles."

Cardui goes to all the weak spots and helps to make them strong. It acts with nature—not against her. It is for the tired, nervous, irritable women, who feel as if everything were wrong, and need something to quiet their nerves and strengthen the worn-out system.

If you are a woman, suffering from any of the numerous symptoms of womanly trouble, take Cardui. It will help you. At all druggists.

GLASS OF SALTS CLEANS KIDNEYS

If Your Back Hurts or Bladder Bothers You, Drink Lots of Water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salt which removes the body's urinous waste and stimulates them to their normal activities. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water — you can't drink too much, also get from any pharmacist about four ounces of Jad Salts; take a teaspoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad salts are inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which every one should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.

FAVOR LEGISLATION TO REQUIRE WIDE TIRES ON ALL ROAD VEHICLES

The Mountainair Business Men's association has sent out the following letter to all sections of New Mexico:

Mountainair, N. M., March 23, 1914.

To the Boards of County Commissioners, the County Road Boards and the Commercial Organizations of New Mexico:

At a recent meeting of the Torrance county road board a resolution was passed favoring legislation making mandatory the use of the wide tire on road vehicles in New Mexico. I was instructed by the Mountainair Business Men's association to write our representatives in congress, suggesting a senate amendment to the house bill appropriating \$5,000,000 to the improvement of our roads, that the states to be used by them in building roads, making this aid available on the contingency of wide tire and uniform gauge legislation. This has been done. At the last meeting of the Mountainair Business Men's association, I was instructed to write to you in connection with this movement, asking your consideration and if it meets with your approval your cooperation.

The only objection to this kind of legislation so far advanced, are that heretofore it has been local in character and would work a hardship on the present owners of vehicles with narrow tires. It is thought possible to secure general state legislation by this method, thus eliminating the first objection, and by fixing a time limit in which the new law should become effective, overcoming the other objection. We would appreciate a reply, giving us your opinion of the above suggestions, and stating what action, if any, you have taken.

Very truly yours, H. E. HEDDING, Secretary Mountainair Business Men's Association.

ANNUAL REVIEW OF FOREIGN COMMERCE OF UNITED STATES

Washington, D. C., March 25.—According to the department of commerce, the foreign commerce of the United States made its highest record in the fiscal year of 1913. Imports, both free and dutiable, were larger than ever before, and exports, both domestic and foreign, were also the largest on record. Imports were 1,513 million dollars against 1,454 million in the fiscal year 1912, and exports were 2,454 million dollars against 2,284 million in 1912.

The changing character of our foreign commerce is illustrated by a comparison of the figures of 1913 with those of earlier years. Imports show in recent years a much more rapid gain than exports. While imports increased but 27 per cent in the 15-year period from 1898 to 1913, they increased 112 per cent in the shorter period from 1900 to 1913.

On the other hand, exports, which increased 47 per cent in the 15-year period from 1898 to 1913, gained only 27 per cent in the period from 1900 to 1913. Imports formed in 1913, 31.8 per cent, and in 1912, 42.4 per cent of the total foreign commerce. Food-

SERVICE AND SOLIDITY

The Banking Requisites

THE satisfactory bank—the only bank which can be of real benefit to the business public—is that which, while assuring absolute security, is prepared to give expert and courteous service not only to depositors but to the public generally.

The success of the STATE NATIONAL BANK has been built upon this winning combination of Service and Solidity.

Your account is solicited.

State National Bank

OF ALBUQUERQUE, N. M.

stuffs imported in 1900 aggregated 231 million dollars and, in 1913, 406 million; manufacturers' raw materials imported increased during the same time from 274 million to 625 million dollars, an increase of 251 million dollars in the value of foodstuffs and raw material imported during this period. On the other hand, foodstuffs exported during the period under consideration show a decline of 44 million and raw materials an increase of 406 million, a net increase of but 362 million dollars in foodstuffs and raw materials exported, compared with an increase of 534 million in foodstuffs and raw materials imported.

In manufacturers, however, the growth in exports has exceeded that in imports. Imports of manufactures for further use in manufacturing increased from 134 million dollars in 1900 to 249 million in 1913, and finished manufactures from 203 million in 1900 to 408 million in 1913, while the export side manufactures for further use manufacturing increased from 153 million dollars in 1900 to 409 million in 1913, and finished manufactures from 342 million to 778 million, the increase in manufactures reported during the period having been 420 million dollars and in manufactures exported 702 million dollars.

The large increase in the valuation of the various groups of merchandise imported and exported in recent years does not represent a corresponding increase in quantities. In a large proportion of the articles forming international trade, prices in recent years are much higher than those in the earlier years of the period under consideration, and the increase in quantities are in many instances less than the increase in total values, this being especially true of foodstuffs and manufacturers' materials.

In finished manufactures the determination of prices is more difficult, though for a limited number of articles prices may be ascertained, and these show in most cases a less advance than that in raw materials or foodstuffs.

A brief but thorough analysis of this foreign trade is to be found in the monograph "Annual Review of the Foreign Commerce of the United States, 1913," Miscellaneous Series

REGULAR AUTOMOBILE PASSENGER SERVICE ALBUQUERQUE TO SANTA FE

Beginning Sunday, March 15th and every day thereafter cars will leave garage at 7 a. m. sharp, arriving at Santa Fe 11 a. m. Leave Santa Fe 3 p. m. arrive Albuquerque 7 p. m.
